

Our Occupational Health, Safety and Environment Policy

The departments of Reemtsma / Imperial Tobacco based at Albert-Einstein-Ring 7, Hamburg work on the development of innovative products, leaf purchasing as well as the analytical and toxicological evaluation of our product portfolio.

Our work is embedded in the Group Occupational Health, Safety and Environment Policy and is based on the following principles which are binding for all employees:

As minimum requirement we follow-up the compliance to all relevant legislation and internal standards.

Together we contribute to the identification and elimination of environmental, health and safety risks at the workplace.

We use LEAN instruments to advance productivity, minimize waste and sustainably reduce the impact on the environment.

We define and track objectives for the continuous improvement of environmental protection, occupational health and safety.

We support our employees by providing relevant training and involve them into the development of our management systems.

We involve contractors in our working principles by obliging them to adhere to our external company guidelines.

We consider the effects of our activities on interested parties.

All employees are called upon and required to fulfil their tasks with commitment and motivation with regard to safety, health and environmental protection in their own interest, in the interest of the customers and in the interest of our company and to participate in the management systems introduced.
